SCH 80 THREADED P.V.C. DROP PIPE

SIZE	O.D.	I.D.	WALL	WEIGHT	MAX SET	MAX HP
1"	1.315"	.957"	.179"	41 cft	600'	1.5
1-1/4"	1.660"	1.278"	.191"	56 cft	495'	2
1-1/2"	1.900"	1.500"	.200"	68 cft	455'	5
2"	2.375"	1.939"	.218"	94 cft	400'	7.5

Bears the NSF Seal of Certification for potable water. The heavy walls of Schedule 80 PVC enable the pipe to withstand the handling required for deep well installation. The smooth interior improves flow characteristics and cuts friction loss. Light weight it is approximately one-fourth the weight of galvanized steel pipe. Furnished in 20' lengths with thread protectors on each end and with couplings shipped separately. Not subject to rust, corrosion, or electrolytic deterioration. Gives many years of longevity. More economical than alternative materials.

PURE-CORE BLUE PREMIUM POLYETHYLENE PIPE PE 3408 PREMIUM HIGH DENSITY POLYETHYLENE PIPE IN COILS

This plastic pipe meets the requirements of ASTM D-2239 and AWWA C-901. The material is special high density PE-3408 & meets cell class 345464. Listed for potability to ANSI/NSF Standard 61. The pipe has a blue exterior cover over a neutral white inner core and is compatible with IPS inside diameter insert fittings. Pipe has a 50 year warranty and is very well suited for use in water wells. Pipe description and pressure rating is stamped into the coil for easy identification.

200 PSI PURE-CORE BLUE POLY PIPE

Suitable for use in hanging a submersible pump at deeper settings that do not exceed 320 feet
