AIR-E-TAINER PRESSURE TANKS F & W's PRESSURIZED BLADDER TYPE TANK

Flint & Walling's Air-E-Tainer pressurized bladder type pressure tanks completely eliminate the problem of water logged tanks. Maximum pressure rating is 100 psi for all models. The increased efficiency of the bladder type tank gives you the same drawdown (usable water before the pump must come on) as a much larger and heavier standard pressure tank. Manufacturers recommend that your tank drawdown be a minimum of one minute of your pumps capacity and preferably two minutes of pump running time. A two part urethane finish over epoxy primer coat combines durability and a high luster appliance type appearance.

Model	Dimensions	Weight	Outlet	Ships UPS	Actual Volume
AT15	10" x 16"	10 lbs	3/4"	Yes	4 Gallons
AT25	13" x 19"	13 lbs	3/4"	Yes	9 Gallons

Tank Top Pump Mount

75 psi STANDARD PRESSURE TANKS

These tanks do not have a bladder inside.

Our standard pressure tanks are rated 75 psi maximum working pressure. These tanks all have a plug in the top of the dome, which allows them to be used as a retention tank as well as a pressure tank. We feel that galvanized gives you the longest life expectancy for your tank.

Model	PSI	Your Cost	Dimensions	Ships UPS	Weight	Construction
42 Gal Tall	75 psi	\$ 462.00	16" x 53"	Yes	44 lbs	Galvanized
